

TEMPORARY AUTONOMOUS MUSEUM

Service Definition:
Leake Street Arches Graffiti tunnel revival service system.

Project Service Object:
Visitors/Graffiti artist/business

Project Service Content:
Historical background introduction, graffiti exhibition, graffiti experience course, get souvenirs, live appreciation

Project Service Carrier :
TEMPORARY AUTONOMOUS MUSEUM event

SOLO

Sep 2018- Dec 2018

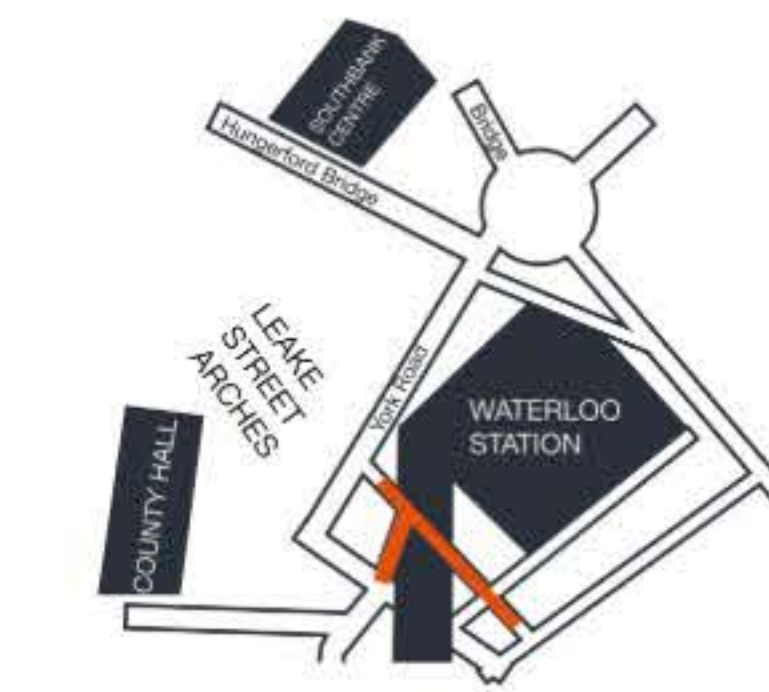

Brief

01 Abstract

Temporary Autonomous Museum (TAM), which turns the idea of the museum inside out. TAM's exhibition is the physical structure (space or building that has been abandoned for historical and economic reasons and then is being reused) itself, which represents the changing city.

Purpose: To raise people's attention to their taken-for-granted surrounding environment and emphasize the relationship between human and physical spaces.

Through the MA term1's project: Refuse the museum, which practicing my critical thinking. I realized that instead of putting the objects in a new building, it would be better to use the graffiti arches that already existed as a temporary museum.

Location: Leake Street Arches

The Graffiti Tunnel (Leake St, Lambeth, London SE1 7NN):

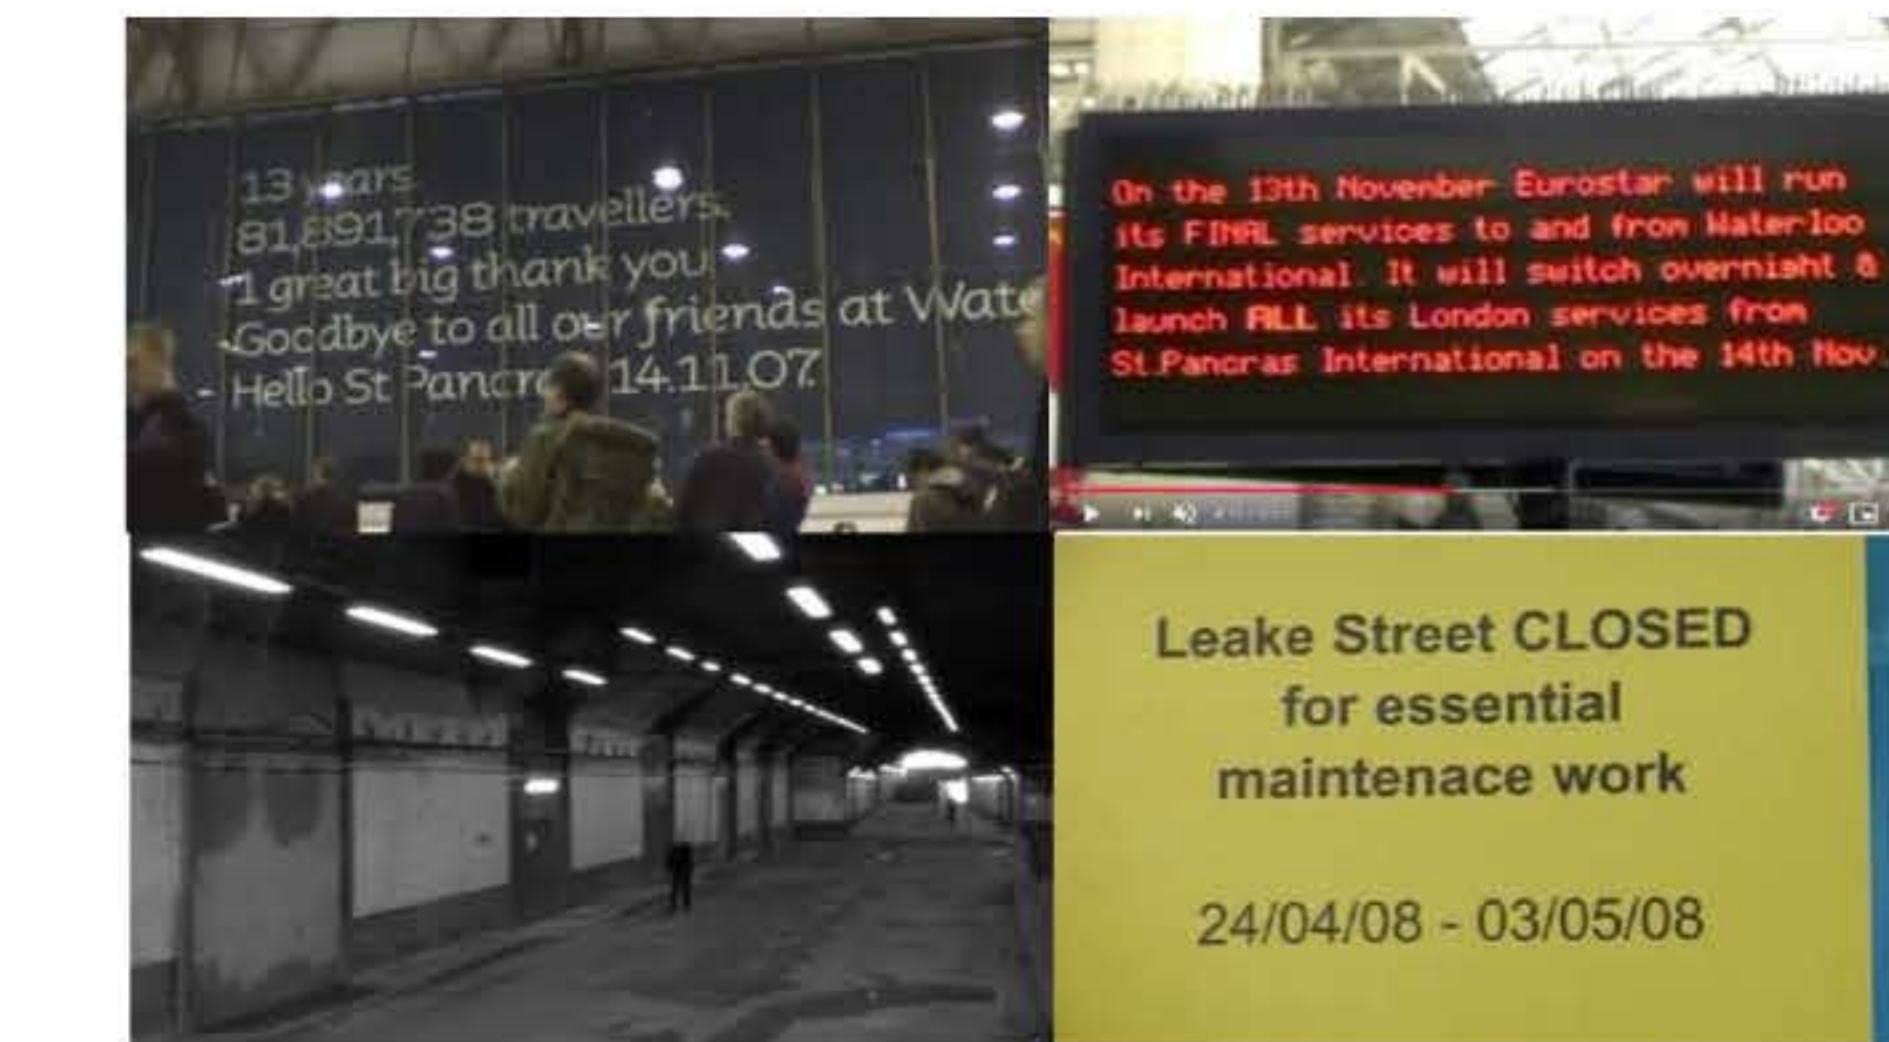

Pedestrian tunnel under Waterloo station covered in legal street art & graffiti.

02 Background

Leake Street Arches

The old Eurostar used to go by Waterloo Station on the way to Paris. When the terminal of Eurostar moved to Kingscross, the tunnel was abandoned (11/2007-04/2008).

The LSA is the passenger corridor of Eurostar London terminal Waterloo Station, it was abandoned in 2007 when the terminus moved to King's Cross Station. Excavated by artist banksy and turned into a legal graffiti tunnel.

04 Background Analysis-SET

S-Society

- Abandoned reasons: Historical development/Low quality/Lack funding chain.
- British government is working to repurpose abandoned space.
- The construction waste generated per 10,000 square meters is 500-600 tons, while the waste generated from old city demolition ranges from 7,000 to 12,000 tons.

E-Economy

- Amount of cultural construction and art industries will participate, the government and social capital can cooperate to participate in investment, construction, and operation.

T-Technology

- With the in-depth promotion of the Internet, it provides a broader platform for model innovation and cross-border integration.
- Service designers improve the overall service system experience by exploring multiple user touch points.

Research and Analysis

01 Case study-SWOT analysis S(strengths) / W(weaknesses) / O(opportunities) / T (threats)

Cahoots Bar

- S** The theme is distinctive, the design of the wine list(newspaper style) and other materials completely reproduces the decoration style of the original subway interior. It combines the operation mode of traditional bars.
- W** 1. Lack of brand operation, market demand is not clear enough.
2. The online and offline platform system is not perfect.
- O** 1. Increase the frequency of live performances; 2. The design of wine cushion and derivative products presents more metro style culture, promoting brand stability and user stickiness.
- T** 1. More competitive products.
2. The service experience process has explored the contact is not rich.

Coal Drop Yard

- S** 1. Complete retention of brick wall style. 2. Combined with a number of merchants, mainly self-created brand stores.
3. Angel's appearance and theme brand image imply beauty.
- W** 1. Lack of brand operation, market demand is not clear enough.
2. Slightly away from the direct traffic stop.
- O** 1. It has the advantages of location and cultural background.
2. The team of well-known architect has a good foundation in the early stage.
- T** 1. The rate of business entry is not high.
2. There is a business district nearby, and there is no advantage in high overlap of brand merchants.

02 Investigation and Analysis

Through site research and interview of tunnel artists, tourists and merchants, the direction of this survey and promotion plan are formulated according to the collected questions.

Site research: Leake Street Arches

VISITOR	GOODS	SPACE	GUIDE	SERVICE
Potential visitors: No must-visit plan just passing by. Frequent visitors: Enjoy graffiti, listen to live, take vlog. Graffiti artist: They regularly come to create because of graffiti legal here.	Graffiti spray can Graffiti related painting materials	100 meters · Tourists or vlogers come to take pictures · Artists draw graffiti on the wall · The graffiti will be covered with new works every Saturday.	· The guide information is not obvious · Based on mine recording for two hours, collected 162 people, 18 people go in to explore.	1 ramen restaurant 1 live house 1 bar (open at 10pm)

Interview: Visitors – insight cards

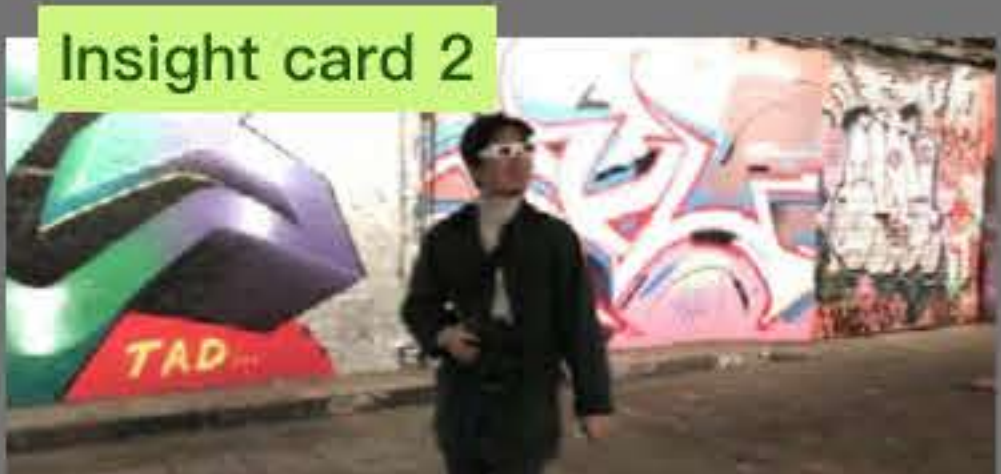

Event

Xia: I like to explore and learn new things, enjoy watching exhibitions and live music. The LSA is a cool place

Fact

I hope to communicate with graffiti artists and even try to graffiti.

Origins

Chao: I am an environmentalist. I like to go to exhibitions and explore why things happen. How did you discover this place?

Fact

Feeling the charm of the reuse of abandoned spaces, I also hope to inspire more people.

Souvenirs

Kate: I like to watch exhibitions and collect all kinds of souvenirs. I think the graffiti elements souvenirs will be fantastic.

Fact

Hope to get the exclusive souvenir.

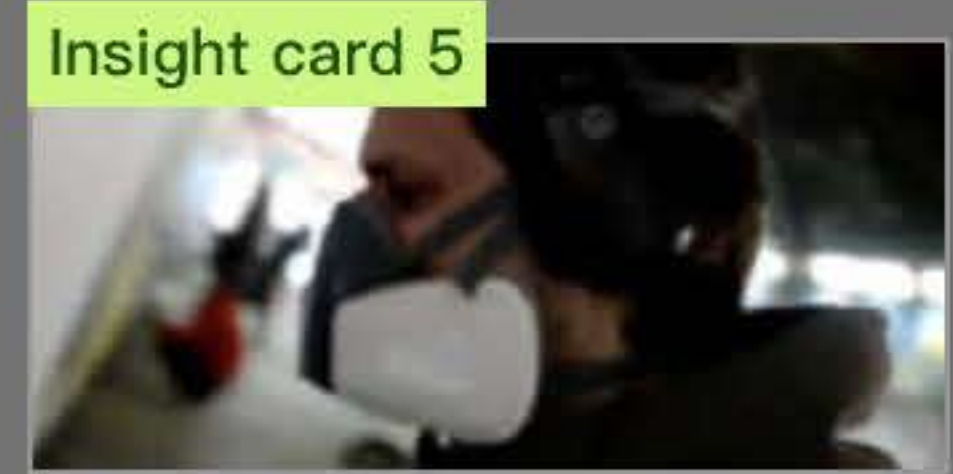

Topic

Leyla: A Vlogger who explores London's interesting scenes, posts on social media, and is also a shop scout.

Fact

Hope to have a different topic experience.

Interview: Artist & merchants – insight cards

Well known

Thomas: Because Banksy reactivated the tunnel, the space was reused and artists had a legal place to paint

Fact

Knows the history of tunnels and is good at graffiti and music.

Footfall

Mars: LSA as a special attraction, and close to the London Eye, did not have the imagined footfall.

Fact

Want more footfall.

03 Painpoint

Lack connection between visitors and artists / Lack information of graffiti tunnel's history.

Good location but unclear guide / Lack characteristic souvenir / less footfall for business

04 Concept

Curate exhibitions and workshops across the leake street arches to optimize visitor experience, improve business footfall and enhance the influence of graffiti artists.

TEMPORARY
AUTONOMOUS
MUSEUM

Cultivating Regeneration History Space by Creating
an Exhibition Experience in Public Space

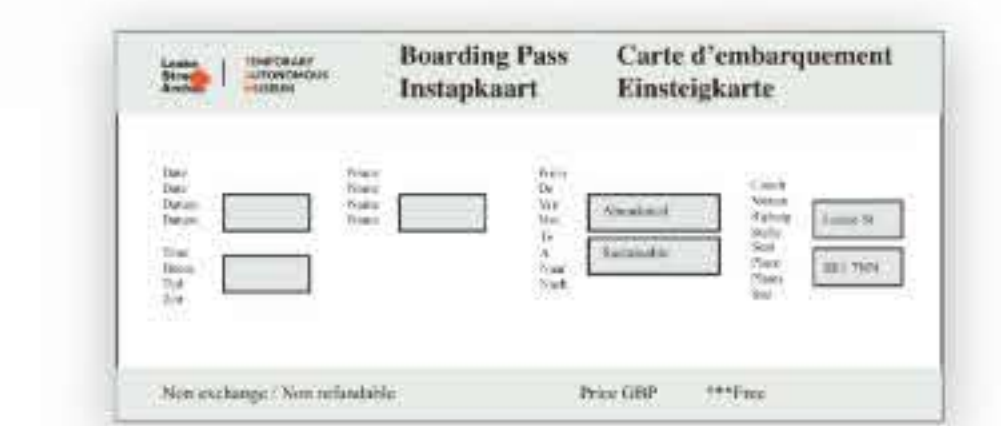

Glasses is the communication tool in this event.
When wearing glasses, visitors can see a monochrome arches, just like
returning to the arches was not abandoned before 2008.
And after taking off the glasses, visitors are return present, and the
abandoned arches are sprayed with graffiti by the artists, full of colour.

03 Communication setting

Warming-up introduction:
We are students from Goldsmiths,UoL.
And we are holding an envents called living with spaces.

Promotion setting:
1. Very interesting suggestion: We designed a pair of magic glasses.
If you want to go back 10 years ago of this arches, please try to wear it during you walking in this arches;
2.This is free, and we are very pleasure getting your feedback, my colleagues are over there and will ask you guys several questions.

Interview/Question setting:
Q1 - What part of this space appeal to you the most?
Q2 - Have you ever noticed abandoned spaces and buildings?
Q3 - What would you do if you had the right to reuse this space?

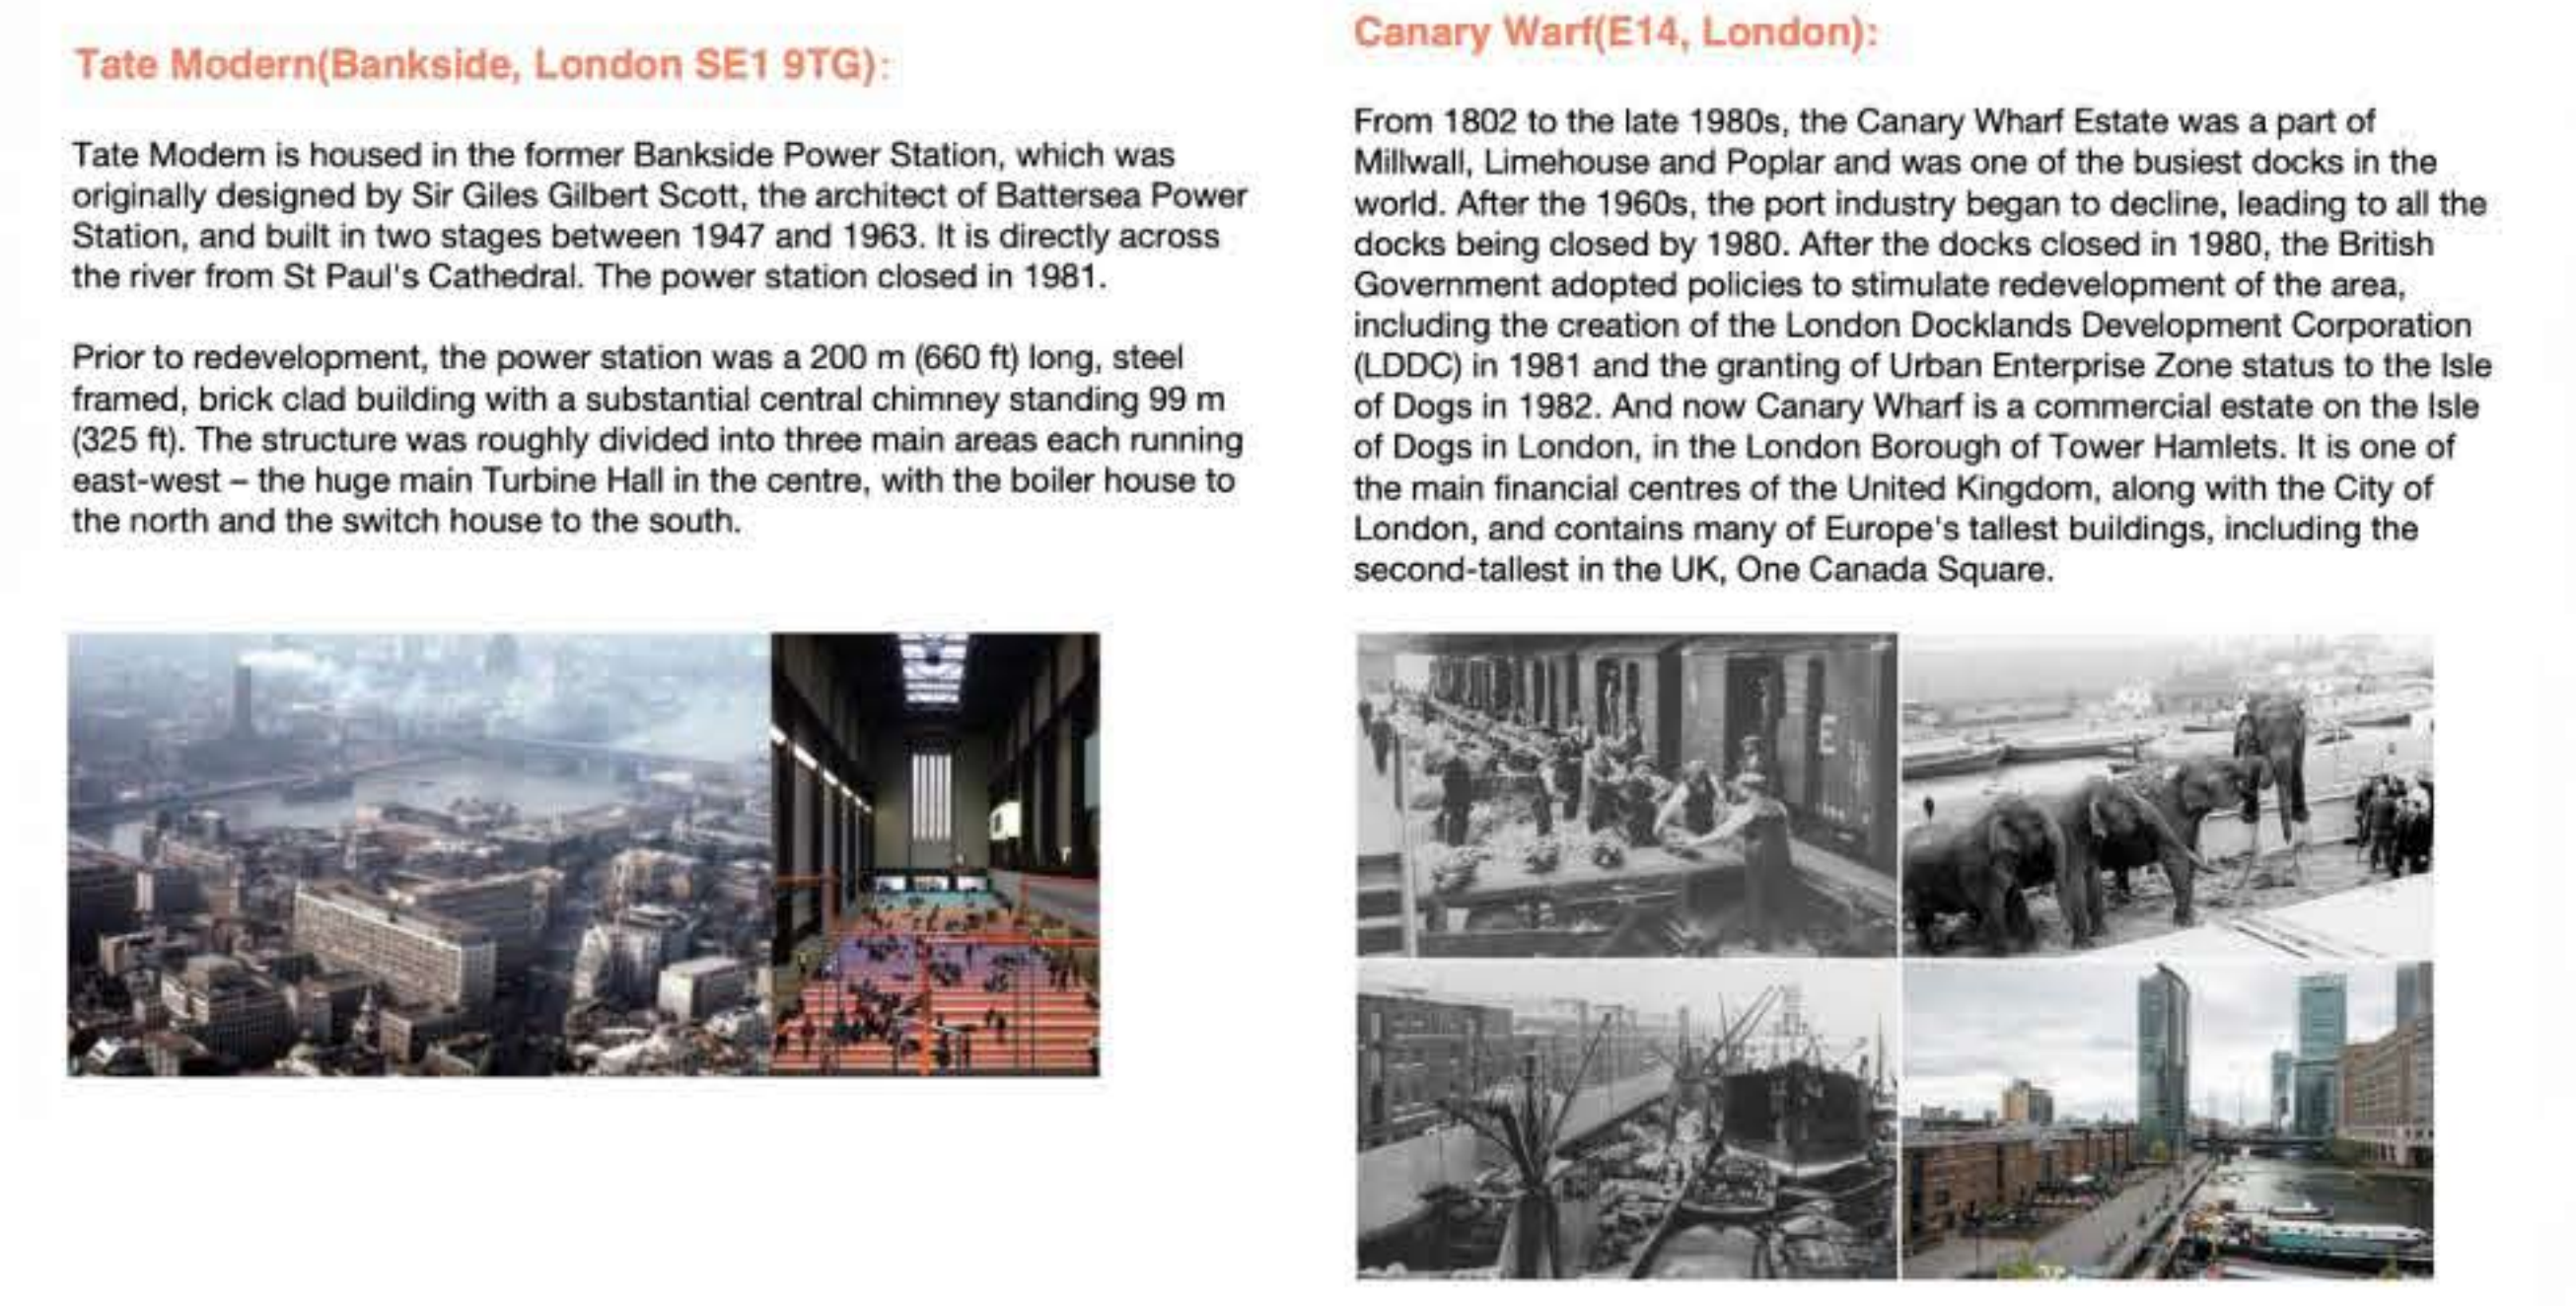

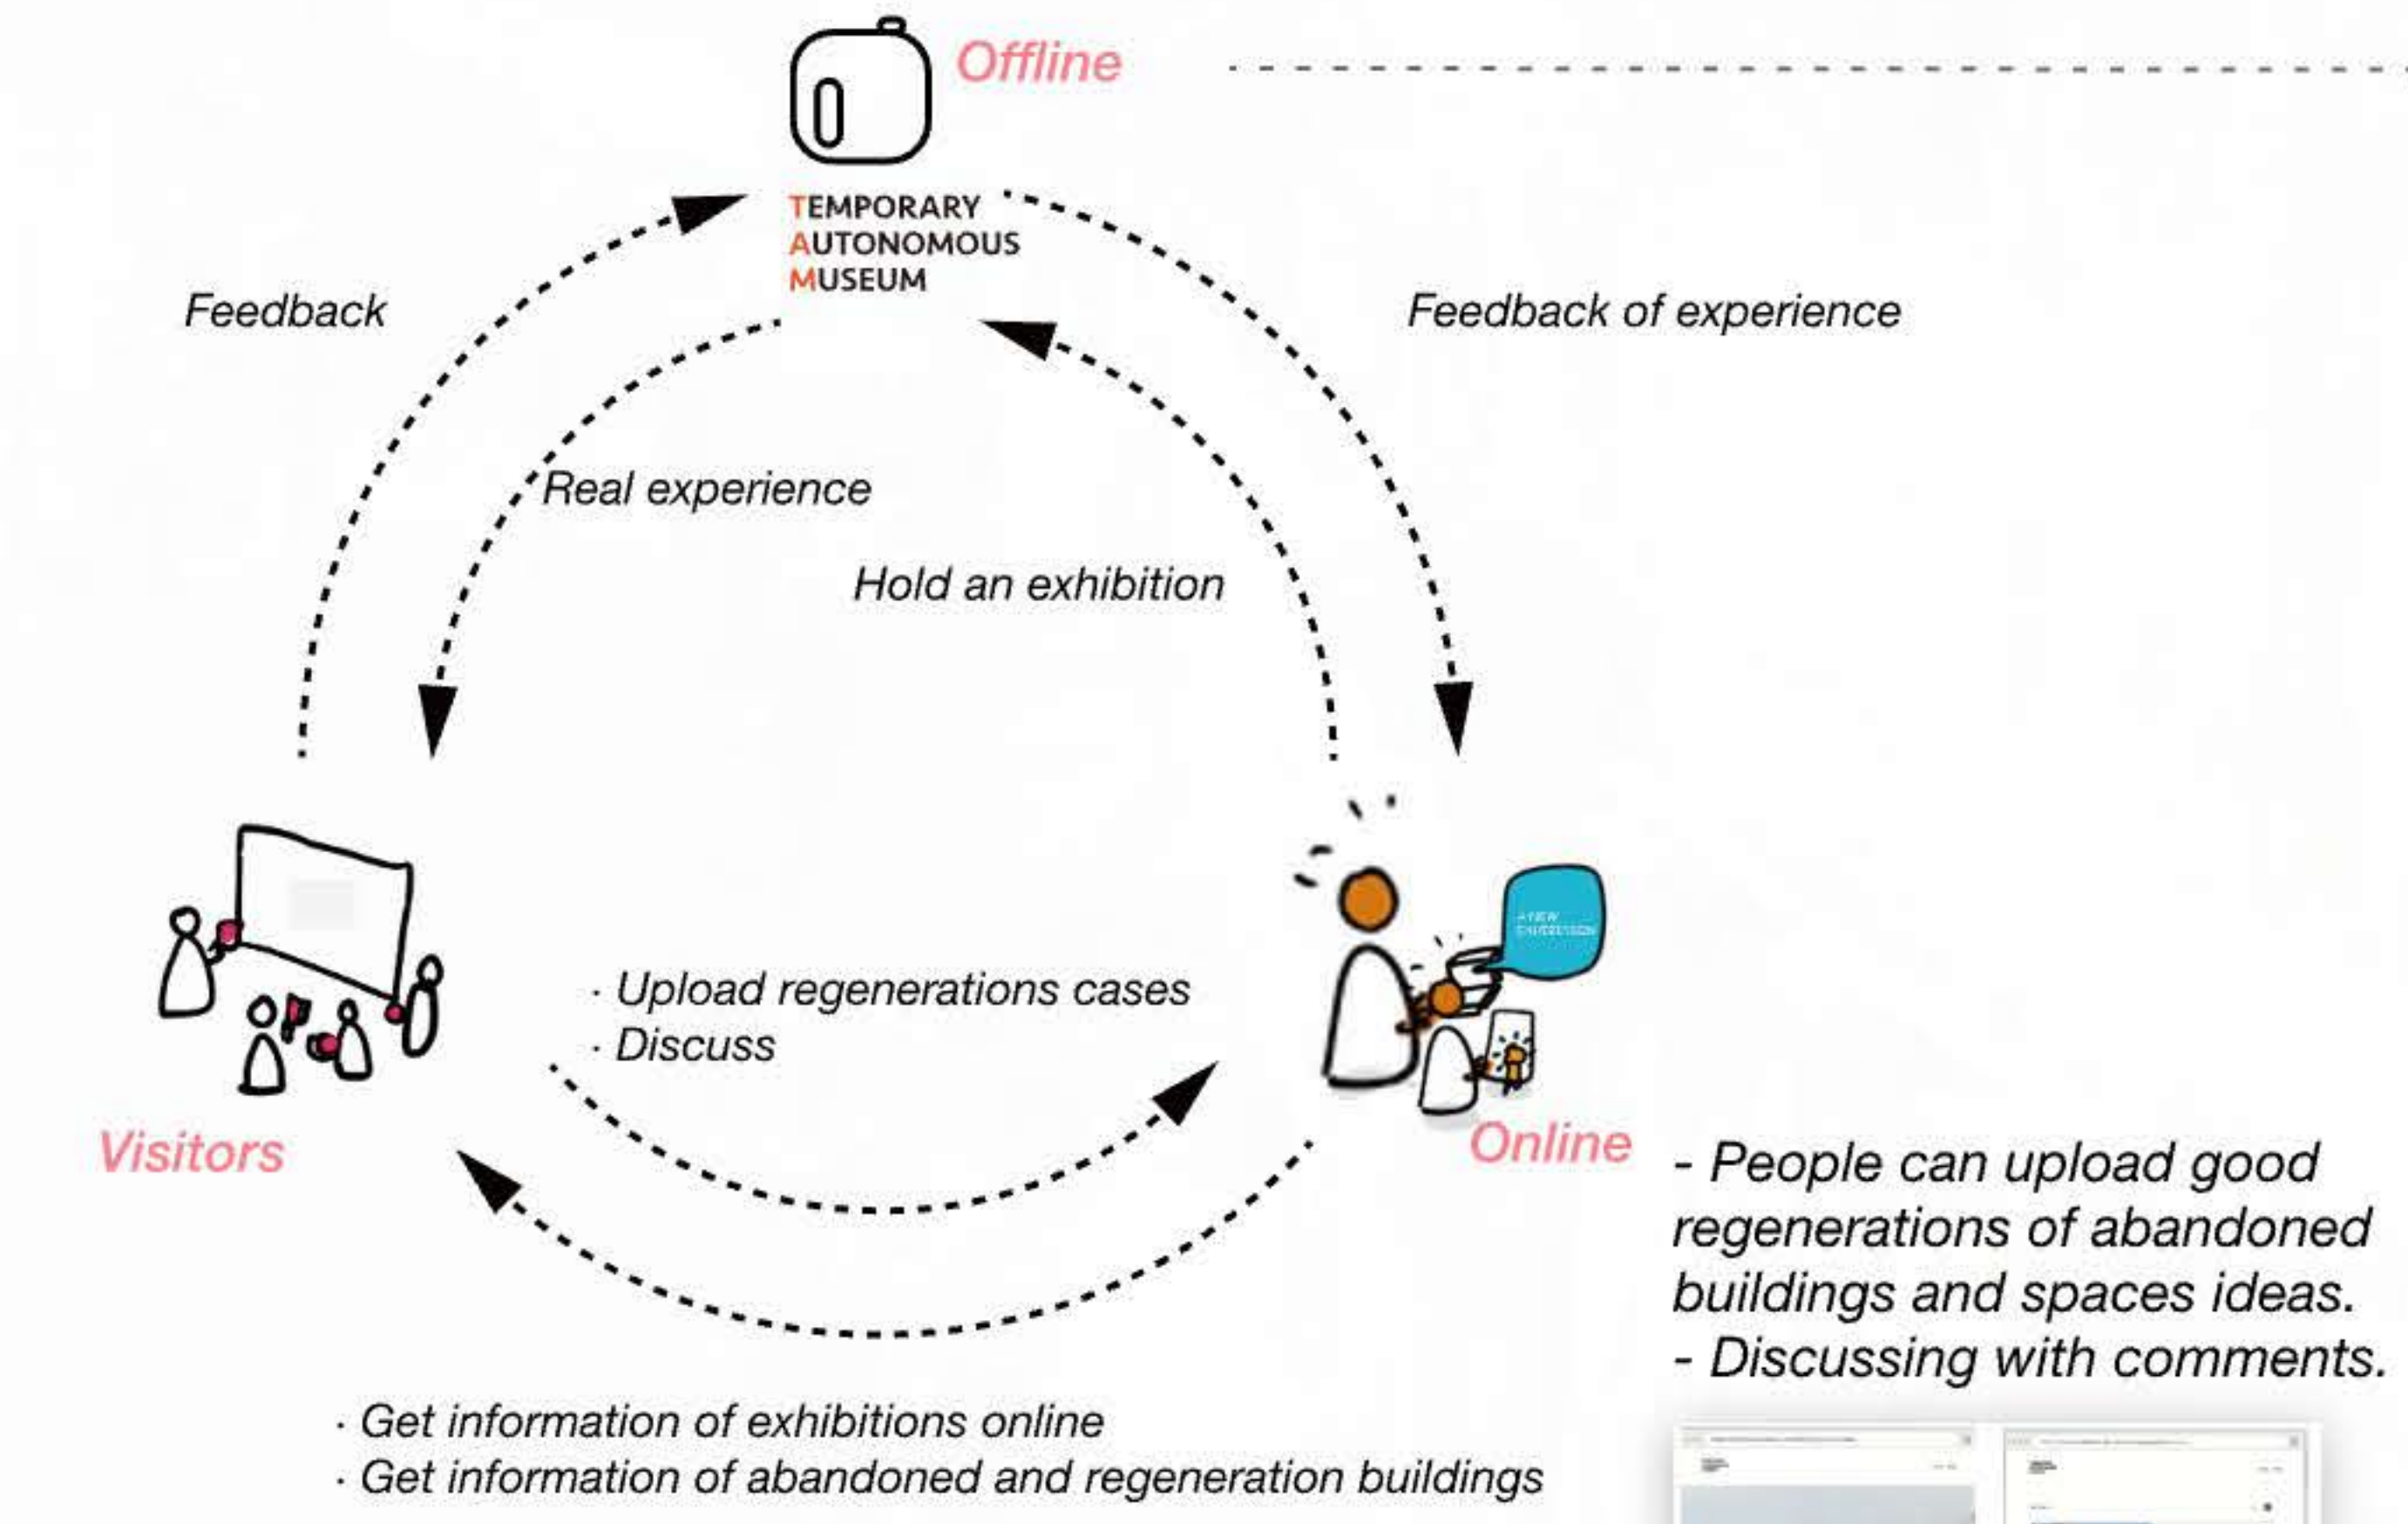

04 Organize team

Insert Function	Account Recently Used	Logical

Equipment	- Introduction - Ticket/Glasses - Installing Gopro	- Camera (take photo that people wearing sunglasses for poster) - Gopro	- Interview / Comments - Give postcard - D90 - Take a photo (hold poster card)

04 Map of Service System

CONCLUSION:
The project is completed through continuous experimentation and iterations. My initial choice site is this graffiti tunnel, but I could propose how this would be staged as a museum or an exhibition, but there is also a couple of other sites that I think could be used in the same way. The main work is the focus on this site. But for this to be more than an idea, which is what I get criticized about.
And I am encouraged that how to expand my understanding of relationality and how this reflected on my competence and role as designers and perspective of the context and system I am actually engaged with - how my understood the actuality of the chosen real-life context in which I was designing.
I am trying to improve my abilities as a curator, enabler, facilitator, connector, storytell- er, visualizer and scenario setter or director. As well as practice the relevant design, critical design and sustainable design.
