

E - Waste

The electronic products like mobile phones make our daily life more convenient.
But at the same time, From 2010 to 2022, the amount of e-waste generated have increased from 34 billion kg to 62 billion kg.

This project aims to uncover the root cause of this issue,
And attempt to design new systems and toolkits to improve and optimize the current situation.

Speculative / Service / Sustainable

this is Master's term 3 project which theme is Futuring / Defuturing the cities based tony fry's theory “future city”、“redieted practice”

 **Paris 2018**

Goldsmiths
UNIVERSITY OF LONDON

Exploratory

Why is there so many E-waste generated?

1. Desktop Research

Reasons of E-waste generated

- 1 Planned Obsolescence: Old products are being replaced rapidly due to performance lag or software incompatibility, not because they have failed;
- 2 Product design tends to be "difficult to repair and disassemble": products that break down due to malfunctions have high maintenance costs
- 3 The recycling system for discarded electronic products is not yet mature.

2. Focus Group

User's attitude facing the broken electronics

1. What kind reason make you to change your elcetronics?
2. Do you wanna repairing instead of changing a new one?

Ami, student in MA design

My Phone's screen is broken, I delivered it to the repair shop, after waiting for 1.5 month, I got my phone, but the ID touch was broken. This way **isn't safe**, because I do not know which good parts will be replaced.

Ivy, student in NYU Paris

It will take €600 repairing my iPhone X's back screen by Genius Bar. I decided to repair it when I back to China. Because it's **hard to find another professional repair shop** in Paris.

Meric, student in MA design

I changed my Macbook's battery **by myself**, It only took €50. I bought the battery and tools on amazon, through learing on YouTube. Unless it will take at least €200 by the repair shop, and waiting 3 weeks.

Baha, student in MA design

My iphone's battery broke down last year. The genius bar's staff suggested me it has a policy that pay €500 will get a new iPhone **instead of repairing the old one**. But I do not want to change my iphone. So I decided to change the battery **by myself** by learning a fixing video. I did it.

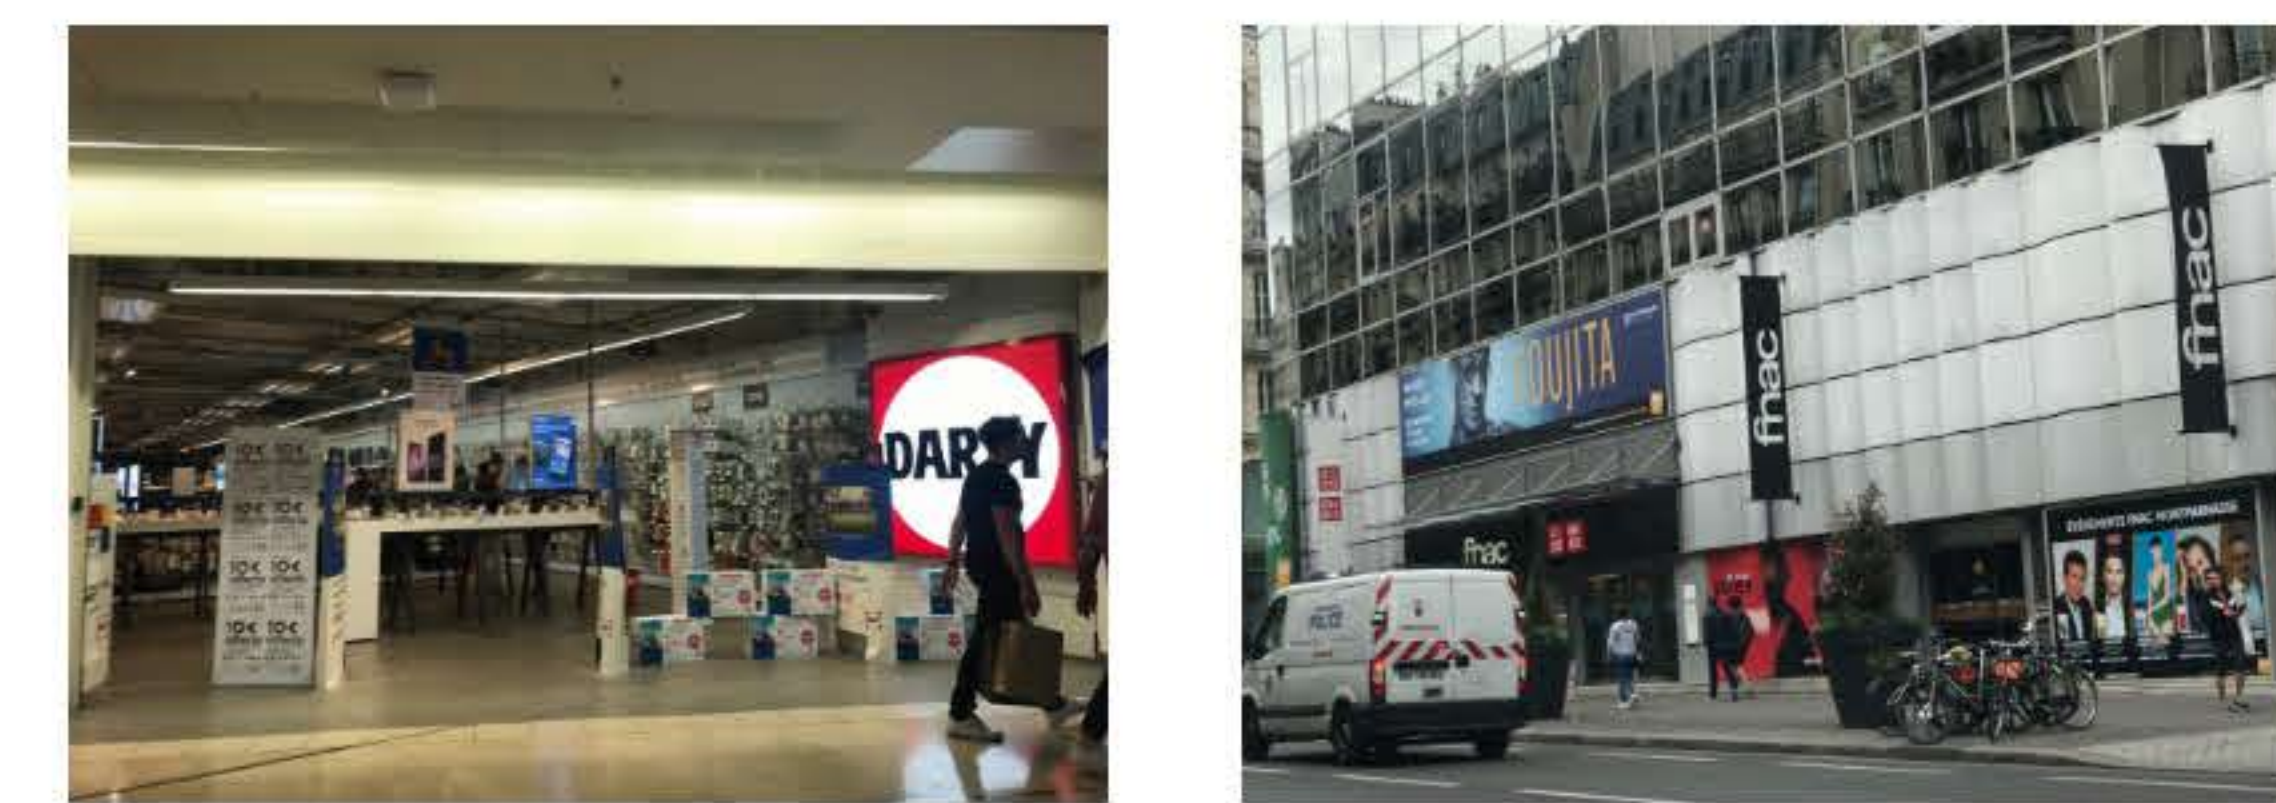

High repair costs, Long repair time, Uncertain repair quality

Exploratory

3、filed research

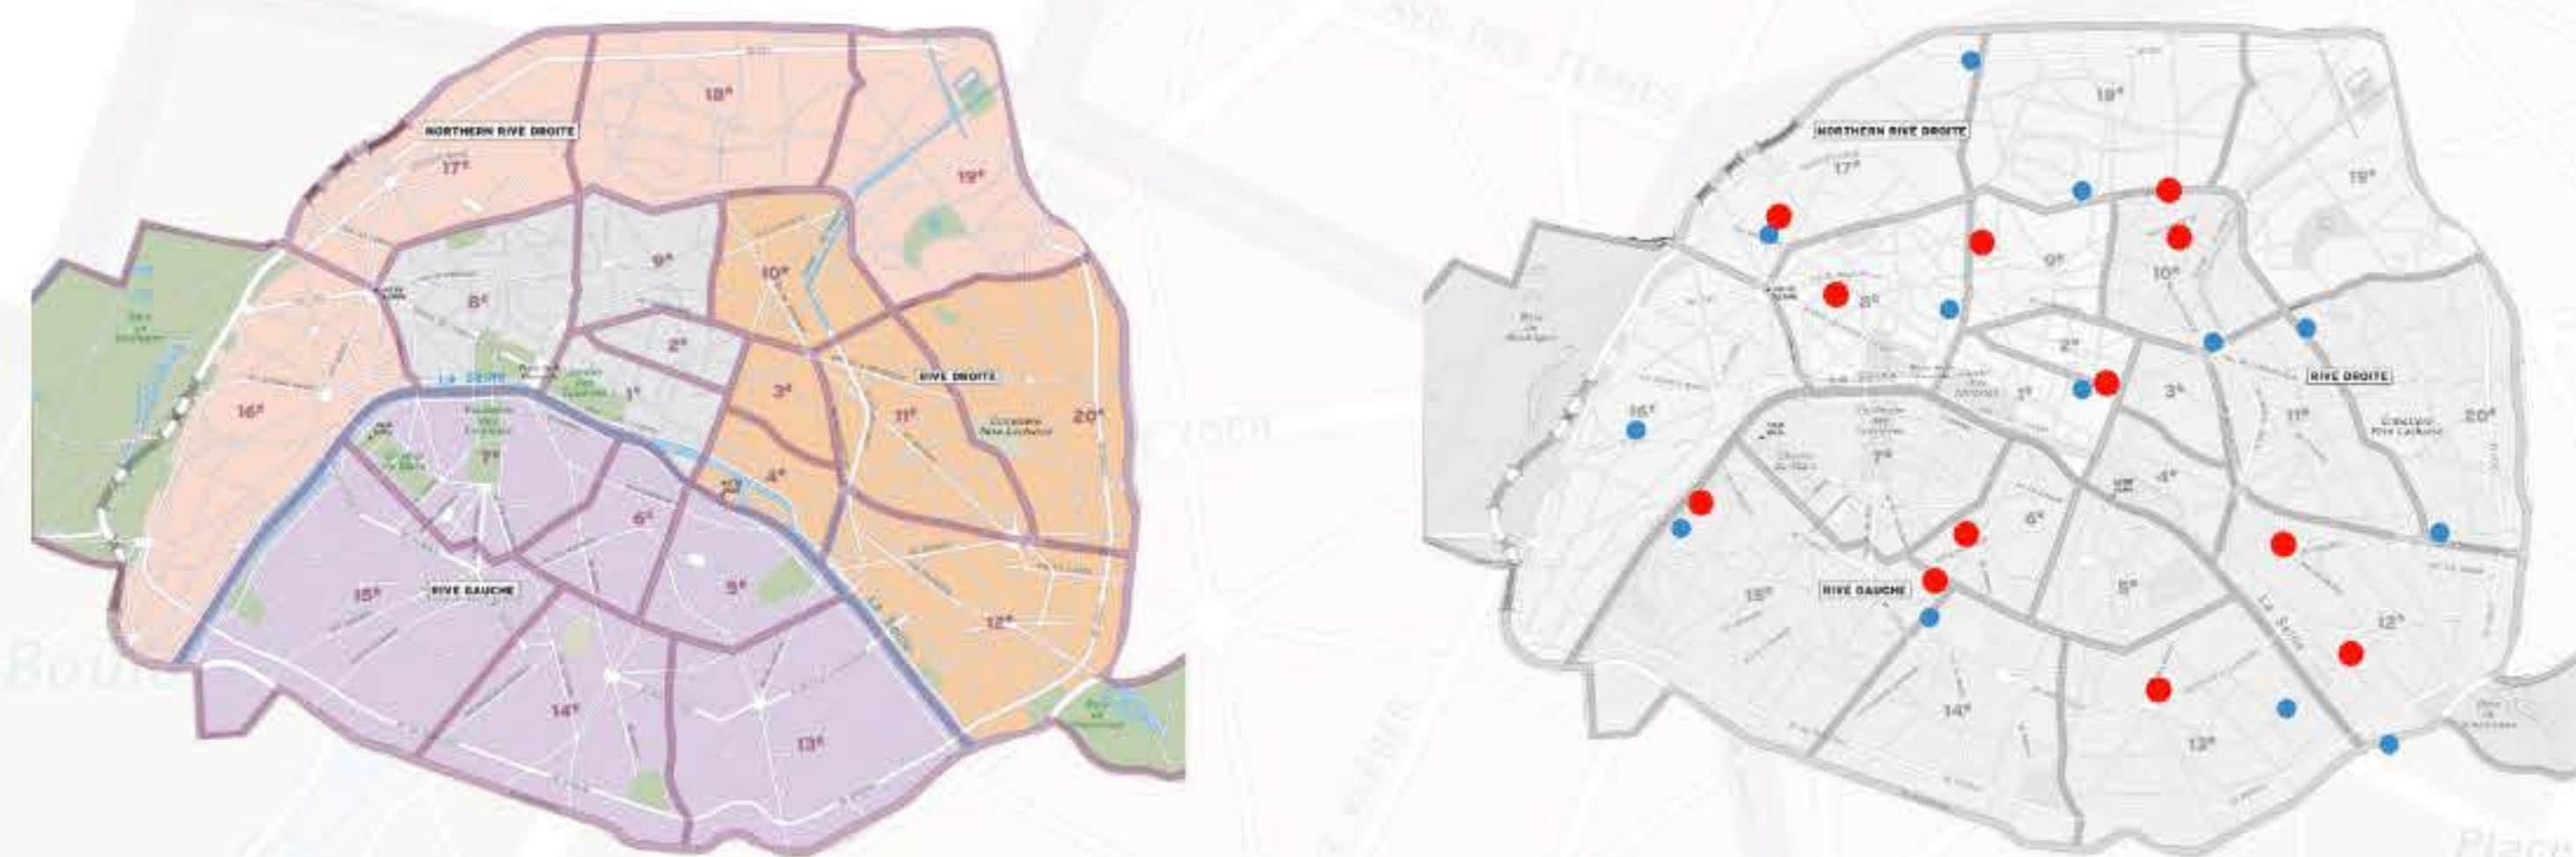

Distribution of Paris electronics shops

- DARTY
- FNAC

补充面积和脚步丈量需要的时间

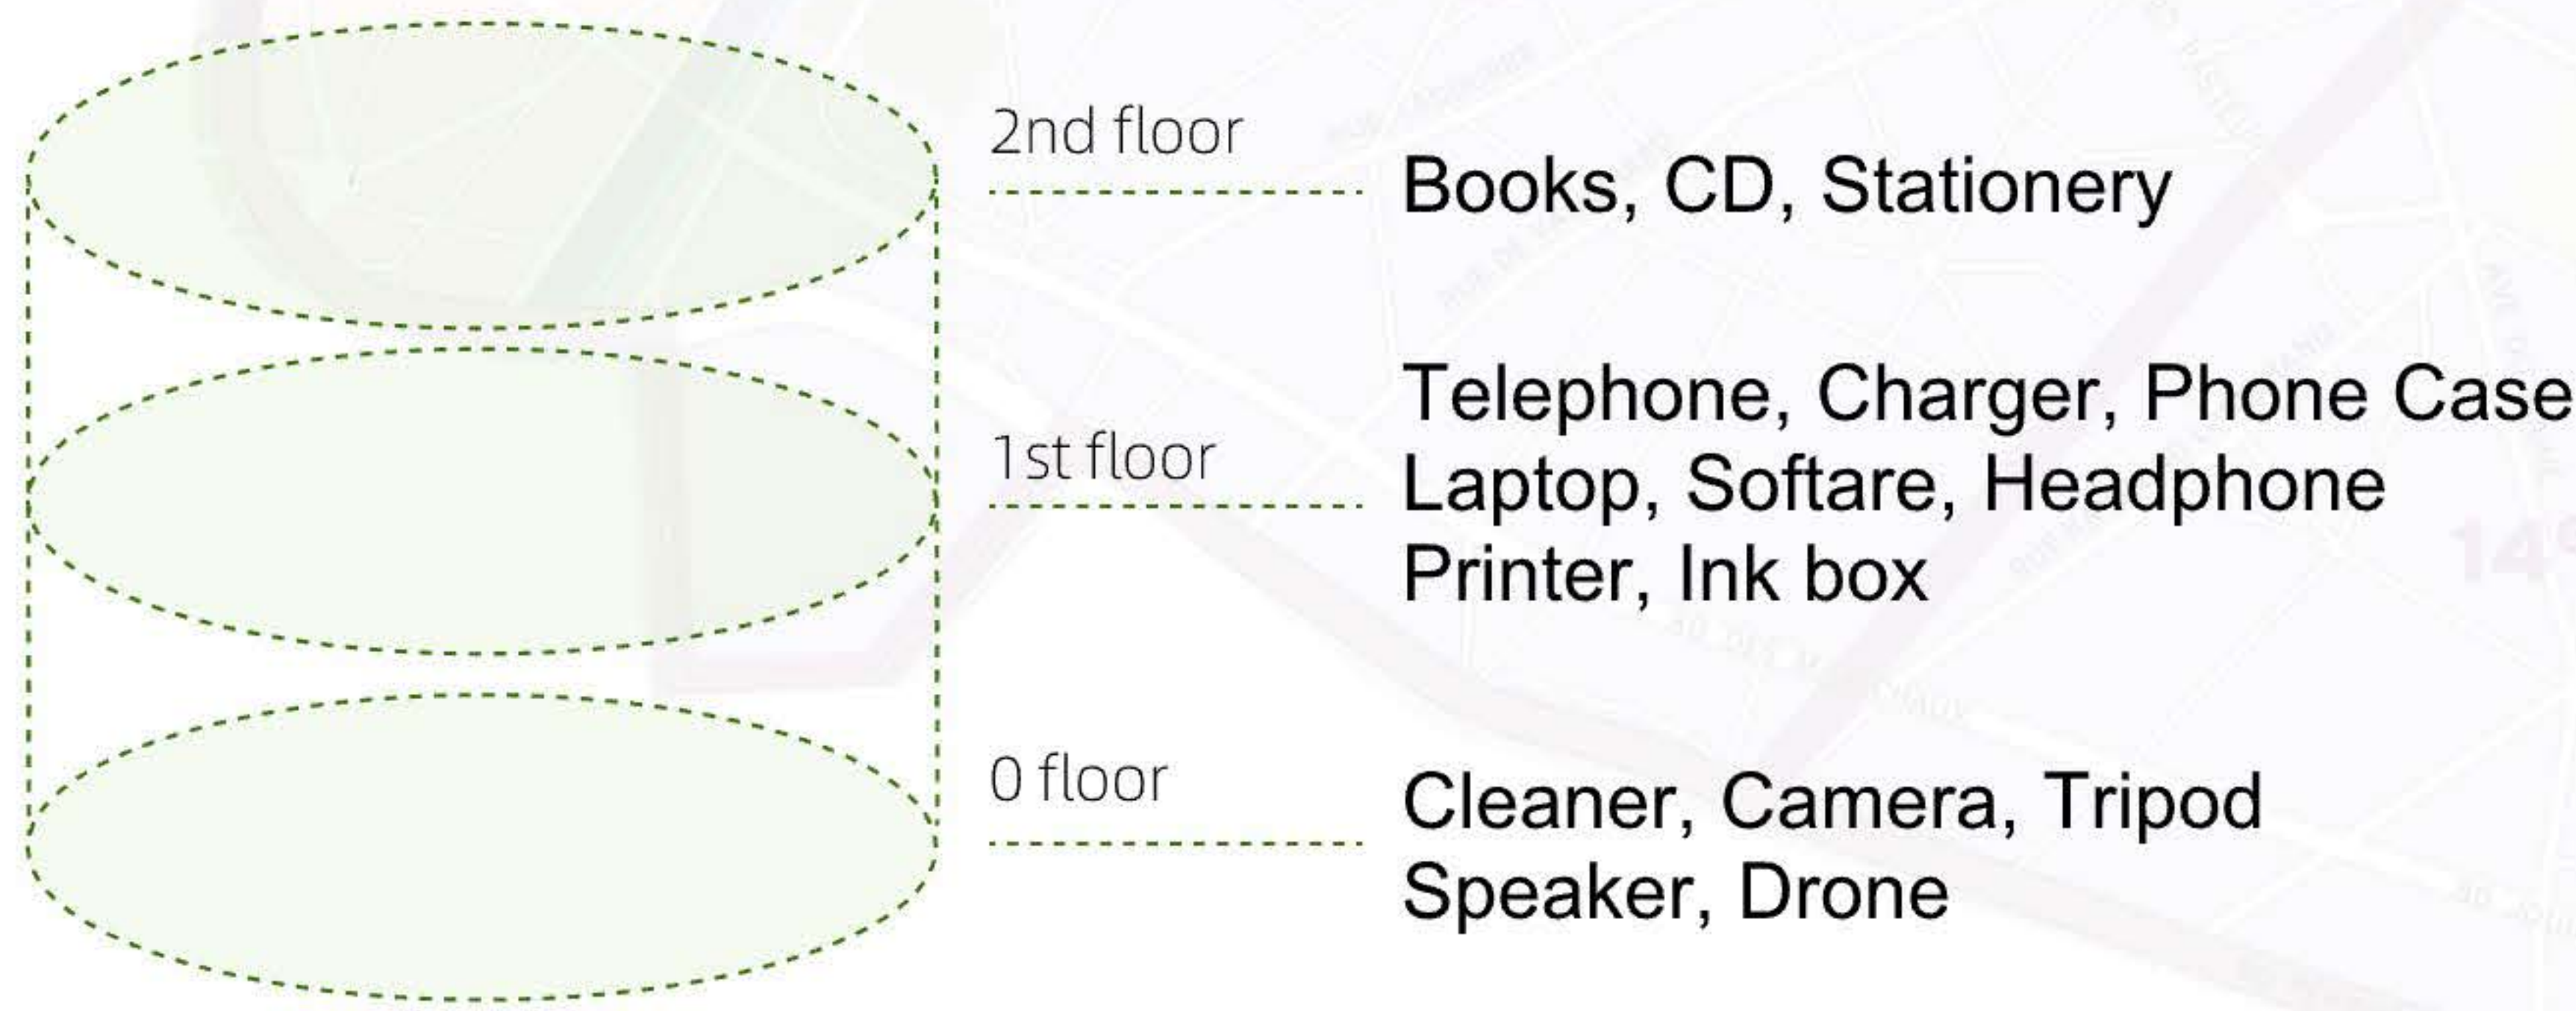

20e arrondissement de Paris

I researched 6 FNAC Shops in Paris

The shop is full of promotional activities.
There is no information for repair service. As well as tips on how to care for your electronics related activities.
About componentry:
Just sell charger, phone case and the headset, and navigation stand.

- FNAC

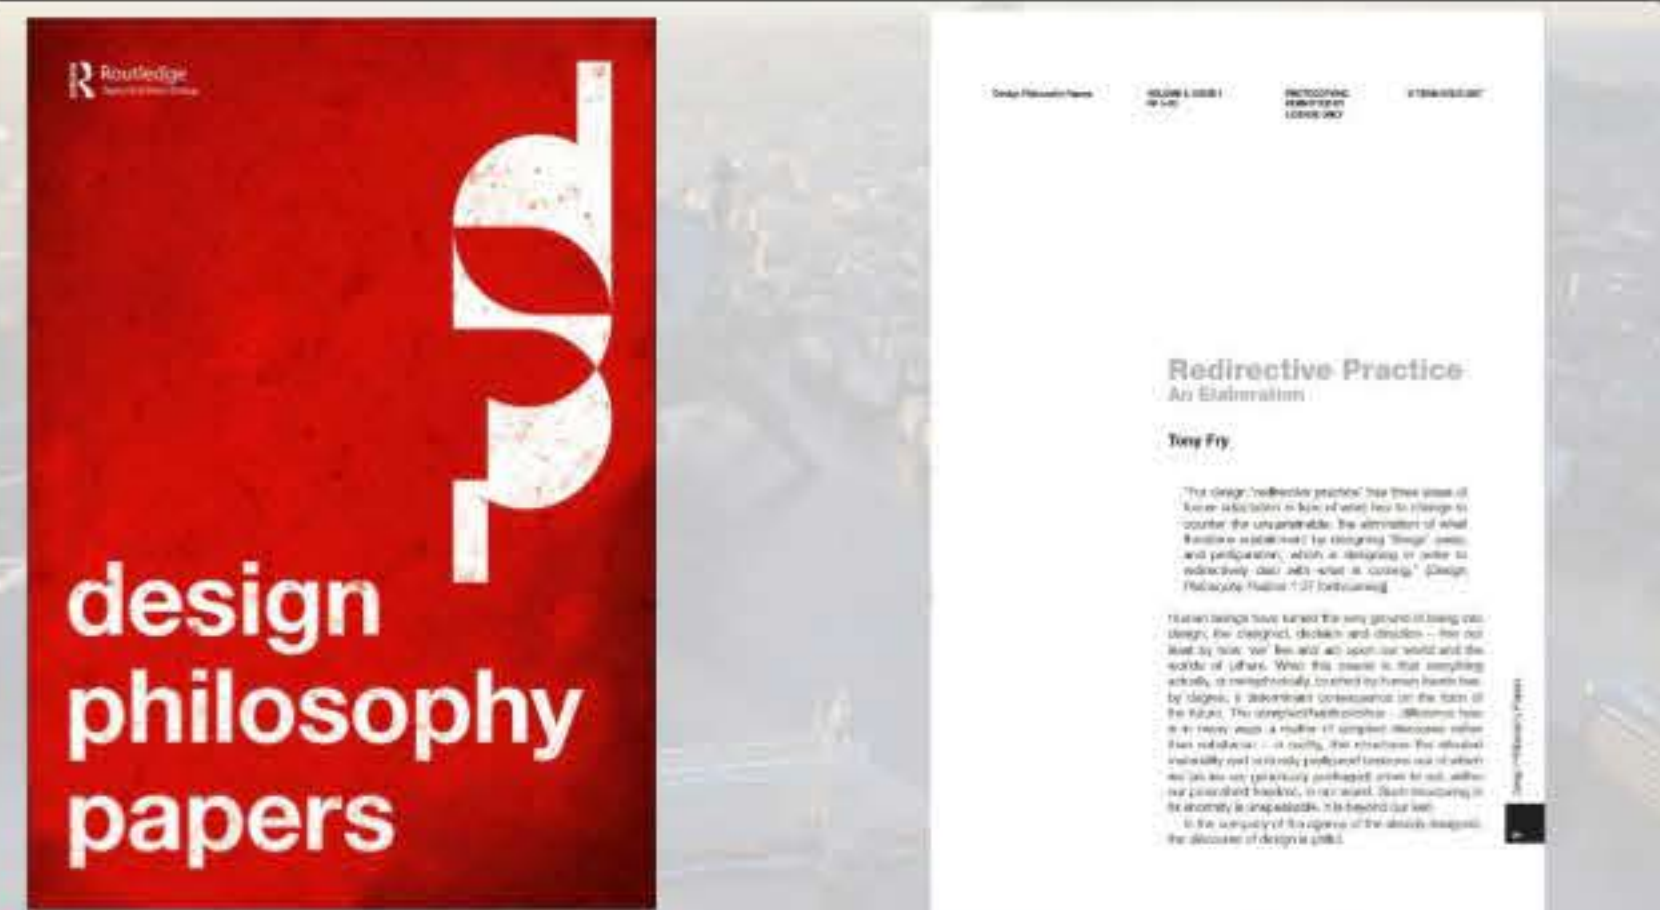

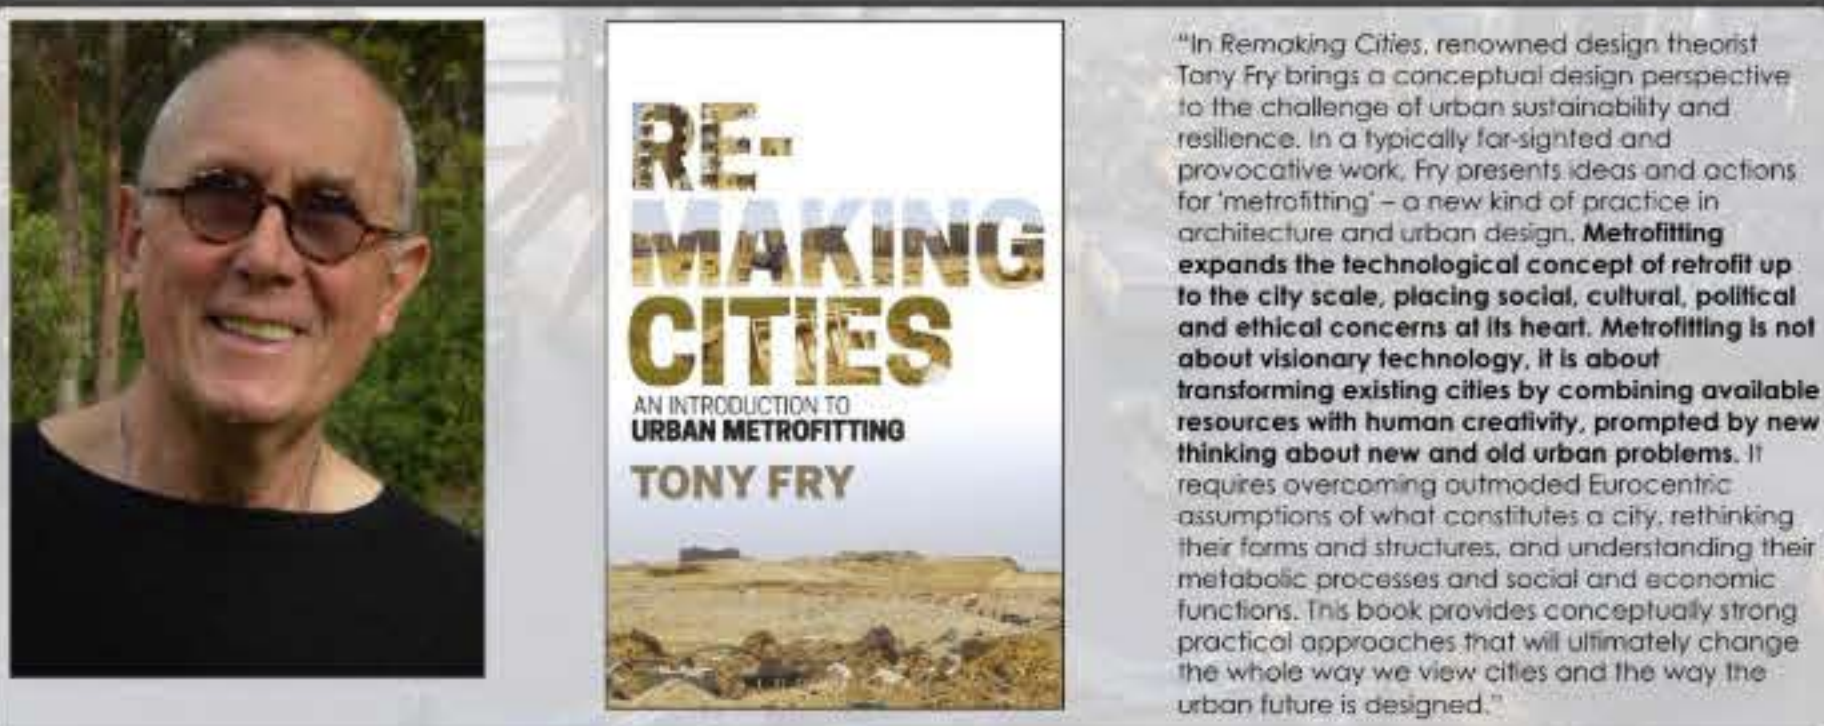

Defination & Ideation

Would you buy a car if it was illegal to replace the tires?
Would you buy a bike if you couldn't fix the chain?

We Have the Right to Repair Everything We Own.
It's high time we demand the right to open, tinker with,
and repair everything we own.

TONY Fry Re-Making Cities

Definition of "Redirective Practice"

'Redirective practice' has three principle areas of focus:

- "Adaptation in face of what has to change to counter the unsustainable"
- "The elimination of what threatens sustainment by designing 'things' away"
- "Prefiguration, which is designing in order to redirectively deal with what is coming."
